Listening Comprehension

True or False?

Listen to the audio and decide whether the following statements are True (T) or False (F).

True or False Exercise

Listen to (or read) the monologue and decide whether the following statements are True (T) or False (F).

1. Triage in the Emergency Department is used to determine patient priority based on clinical urgency.
2. Minor injuries in the ED are treated before severe chest pain to keep the waiting room clear.
3. Multiparameter patient monitors in the ICU continuously measure parameters like heart rate and SpO_2 .
4. Mechanical ventilators are used to control precise flow rates of intravenous medications.
5. Infusion pumps and syringe drivers allow nurses to administer IV fluids at precise flow rates.
6. Mobile crash carts on general wards are checked once per month by the nursing staff.

7. An AED delivers an electrical shock to help reset lethal cardiac arrhythmias.
8. The Radiology Department is responsible for analyzing blood, tissue, and fluid samples.
9. CT scanners and MRIs are diagnostic imaging tools used within the Radiology Department.
10. The pneumatic tube system uses air pressure to transport sample capsules through hospital walls to the laboratory.

Answer Key

1. True
2. False (*Patients with severe chest pain are prioritized over minor injuries.*)
3. True
4. False (*Ventilators assist with breathing; infusion pumps control medication flow rates.*)
5. True
6. False (*Crash carts are checked at the start of every shift.*)
7. True
8. False (*The Clinical Laboratory analyzes samples, not Radiology.*)
9. True
10. True
